

FLCDC FALL NEWSLETTER

Meet and Greet

The 2023 Fort Lauderdale Community Development Corporation meet and greet was held on Monday October 9th, 2023 at 7 p.m. It was a good time for all in attendance. The meet and greet gave the board members and residents an opportunity to get to know each other and share refreshments.

We talked about the results of the annual residents survey. The key concerns were parking and getting additional feedback to improve services for residents. FLCDC's goal is to help improve the quality of life for all FLCDC for all residents. The FLCDC, executive director, board members and property manager will explore ways to improve the parking situation at all apartment buildings.

Residents Mr. Jones and Ms. Hamilton discussed suggested money management and financial literacy classes as well as first-time homeownership classes. They also brainstormed ways to increase resident participation for the next meet and greet event. We look forward to bringing solutions to your concerns and increased access to recommended services.

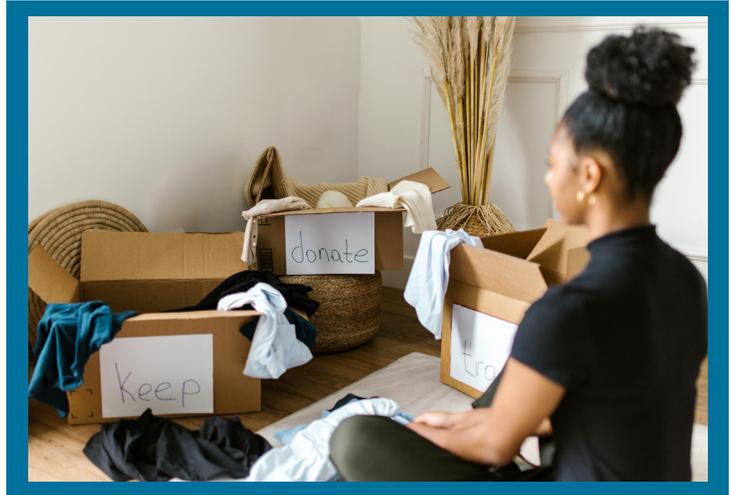

FLCDC strives to provide affordable housing in your community and are excited to serve you.

Health and Safety

The FLCDC makes every effort to provide a safe, healthy and clean living environment for you and your family. Please help keep your community clean by using the trash bins. Put your garbage and trash in garbage bags before placing the bags in the containers. Do not leave loose garbage and trash around the bins or on the ground.

Now may be a good time to remove clutter from your home. If you have clean clothing, small appliances or toys that are in working condition, consider donating items to Goodwill or a charity of your choice. This act of generosity will help you create a cleaner living space for yourself while helping someone else too.

Your Health—Get Your Flu Shot

Flu season occurs during the colder months, starting as early as October and sometimes continuing into May, although it usually peaks between December and February.

In the workplace and in school, shopping etc. we are all exposed to the flu. Be on the lookout for children or adults suffering with fevers, coughs, and sore throats. Take care and get your flu vaccination, wash your hands often, wear a mask in close quarters especially with strangers. Senior citizens are especially vulnerable. If you have flu like symptoms, seek guidance from your medical provider.

FLU FACT:

Getting a flu shot will likely lower your risk of getting sick by 40% - 60%. And if you do get flu, its often less severe.
